Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 28-31 are rejected under 35 U.S.C. 102(b) as being anticipated by US Szerlip et al US 5364370 A.

Szerlip et al discloses a discloses a needle device (see fig. 1) comprising a housing (34) having a base (30) adapted to be placed next to a surface of a needle penetrating site, the base (30) including an opening (18, 44); a needle (36) mounted for a movement between a retracted position in the housing (34) and an extended position, where a portion of the needle (36) extends through the opening when in the extended position; an actuator (22 see fig. 2) movably mounted to the housing (34) and movable between an unactuated position at which the needle (36) is in the retracted position and an unactuated position at which the needle (36) is in the extended position, the actuator being biased toward the unactuated position; a retraction mechanism that automatically moves the needle (36) from the extended position to the retracted position upon releasing the base (30) from the site surface; wherein the retraction mechanism (see fig. 3) maintains the needle (36) in the retracted position upon moving the actuator (22) to the actuated position; further comprises a locking mechanism (see fig. 3) that prevents the needle (36) from moving back to the extended position once the needle (36) has been moved from the extended position to the retracted position, and is integral with the retraction mechanism (see fig. 3).

Allowable Subject Matter

Claims 4-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 1-11, 13-16 and 28-31 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
